The “MR” range of ESD magazines, designed and built to exacting standards, are capable of handling temperatures, of 60°C or up to 120°C.

Constructed of a sturdy metal frame and end plates complete with integral lifting handles.

Up to 50 PCBs can be held in each magazine.

The adjustable side plate, located on guide rails, has a quick-release mechanism which provides for fast adjustment and flexibility for different product sizes.

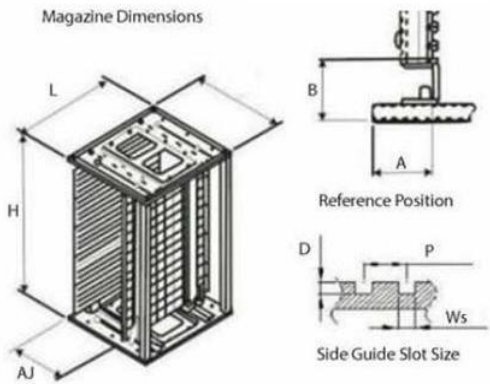

A removable product retaining bar holds the loaded PCBs in place during transportation.
